EXPERIENCE

Product Operations and Strategy Intern

May 2026 – July 2026

Bytedance | TikTok Shop US

- Implemented an automated sample inventory tracking system for products across 50+ merchants, reducing manual data entry by 60% and enabling same-day visibility into stock levels
- Built merchant anomaly detection pipeline with 95% precision, identifying 6-8 at-risk merchant accounts monthly
- Developed real-time KPI dashboard for merchant and product performance across with 20+ daily users
- Assisted in campaign outreach for TikTok Shop Deals For You Days

Software Development Intern

May 2024 – May 2025

Helcim | Risk Team

Calgary, AB

- Containerized services using **Docker** and deployed workloads via **Kubernetes**, improving consistency/scalability
- Created API 50+ RESTful API routes in **PHP** and **GoLang**, supporting 5000+ monthly requests and improving cross-team integration through respective documentation
- Wrote and optimized complex queries in **MySQL** and **BigQuery**, reducing data retrieval times and enabling faster analytics for internal teams
- Implemented and delivered 300+ feature enhancements and change requests in collaboration with the **Trust & Safety Team** while ensuring PCI compliance and fraud mitigation complete with respective unit, feature, and integration testing

PROJECTS

MemoSpace | *Swift, ARKit, RealityKit, SceneKit, Git* | devpost.com/software/memiscap

Jan. 2026

- Built an iOS AR application that captures real-world spaces using LiDAR and reconstructs them as navigable 3D environments
- Designed a spatial memory system where photos and notes are anchored in 3D space based on camera position
- Exported reconstructed environments to PLY for replay and visualization using a custom AR viewer pipeline

scorETF | *Python, pandas, numpy, matplotlib, Streamlit, seaborn* | github.com/stovetopman/scoretf

Oct. 2025

- Developed a full-stack ETF screening and scoring app with an interactive **Streamlit** interface powered by live data from Yahoo! Finance via **yfinance**
- Implemented core financial analytics in **Python** (**pandas**, **numpy**), including annualized returns, volatility, and Sharpe ratios to generate transparent rankings
- Visualized key portfolio insights using **matplotlib** and **seaborn**, featuring time-series performance graphs
- Added portfolio summaries with composite quality scores and explanations, enhancing interpretability and decision-making support for users

PhotoFinish | *Swift, SwiftUI, Firebase* | devpost.com/software/photofinish

Mar. 2025

- Designed and developed a cross-functional iOS app that blends productivity and social interaction through photo journaling and smart reminders
- Implemented authentication and verification with **Firestore Authentication**, ensuring secure reliable user access
- Delivered a fully standalone app with a clean, intuitive UI/UX using **SwiftUI**, improving user engagement

EDUCATION

University of British Columbia

Expected Graduation: Spring 2027

Computer Science and Business

Vancouver, BC

Completed Courses: OOP, Software Construction, DSA, Computer Systems, Algorithm Design and Analysis, Relational Databases, Applied Machine Learning, AI: Computational Agents, IT/IS Development, Software Engineering and Development

TECHNICAL SKILLS

Languages: PHP, GoLang, Java, Python, JavaScript, Swift, HTML/CSS, LaTeX, TypeScript, R, C/C++, SQL

Frameworks: React, OpenCV, pandas, Swing, Flask, JUnit, PHPUnit, Mocha, Vue.js, Laravel + Livewire, FastAPI, Scikit-learn, CatBoost, XGBoost, LightGBM, matplotlib, Streamlit, seaborn, PyTorch, numpy, Tensorflow

Misc.: GCP Bigquery, Tableau, PowerBI, Git Version Control, computer vision, Aeolus Data Analytics, visual querying
